European Solar Energy Storage

Plural energy Burkina Faso

Overview

How is energy used in Burkina Faso?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

What are the different types of energy transformation in Burkina Faso?

One of the most important types of transformation for the energy system is the refining of crude oil into oil products, such as the fuels that power automobiles, ships and planes. No data for Burkina Faso for 2021. Another important form of transformation is the generation of electricity.

Who regulates electricity in Burkina?

The energy regulator is the Electricity Regulatory Authority (ARSE). The National Electricity Company of Burkina (SONABEL) is the main vertically-integrated electricity operator with a national monopoly on the generation and distribution of electricity in the urban centres.

How has Burkina Faso changed over the years?

Burkina Faso has made remarkable progress in recent years, with an increase in installed capacity from 324.6 megawatts (MW) in 2017 to 410 megawatts in 2019. The share of renewable energy also surged from 9.4% in 2015 to 18.36% in 2019.

How much solar energy does Burkina Faso have?

larly solar energy. Burkina Faso benefits from daily sunlight of 5.5 KWh/m2 for 3000 to 3500 hours per year, with a uniformly distributed solar resource across the national territory, yielding an.

How long does a power outage last in Burkina Faso?

The average power outage time was 233 hours in 2018, compared with 172 hours in 2017. In addition, the cost of energy remains high for households and businesses, at XOF 75 per KWh of high-voltage electricity in 2019. No on-grid IPPs operating in Burkina Faso
