What is 123 smartbms Gen3?

123\SmartBMS gen3 is an easy to use yet advanced, modular BMS to keep your lithium batteries in perfect condition, increasing the lifespan of the battery pack. The BMS measures important data like cell voltages, cell temperatures and in- and outgoing currents with the two included high accuracy, dual range current sensors.

How do I use the 123 smart BMS?

Simply connect your phone or victron GX device to the 123 Smart BMS to view relevant information about energy consumption, stored energy, incoming and outgoing current, cell voltages and temperatures. With this information you can control charging, discharging and active balancing. There are 11 products.

What is 123smartbms Gen3 between board?

The 123SmartBMS gen3 Between Board is an additional module developed to be installed on each cell of the battery as an extension to the. The 123/SmartBMS to USB cable is a handy cable which can be used to display BMS data on the Victron Cerbo/Venus or for custom 123/SmartBMS.

What is 123smartbms?

123SmartBMS is the brain on your battery! - Dutch design and production; highest quality and functionality with a low price tag. If playback doesn't begin shortly, try restarting your device. An error occurred while retrieving sharing information. Please try again later. 123SmartBMS (Battery Management System) manages a rechargeable battery-pack.

What is a 123/smartbms to USB cable?

The 123/SmartBMS to USB cable is a handy cable which can be used to display BMS data on the Victron Cerbo/Venus or for custom 123/SmartBMS. 2 meters

VD wire 0.75mm<sup>2</sup>. With this wire you connect the boards to each other.

## Installation

Im Gegensatz zu vielen anderen BMS verfügt das 123SmartBMS über eine umfassende Victron-Integration. Dies bedeutet, dass es möglich ist, ein oder mehrere 123SmartBMS an das Victron anzuschließen, um die Victron-Geräte direkt über DVCC zu überwachen und - optional - zu steuern. Die meisten Victron-Geräte können über ein GX ...

## 123SmartBMS manual

The 123SmartBMS Battery Management System (or BMS ) is primarily intended for prismatic cells, but can also be adapted by the end-user for other cell shapes, provided the cell voltage is in the working voltage range of the cell modules. For more info about the working voltage range, see section "Specifications".
