Could a Floating photovoltaic plant and a wind park work in Albania?

State-owned utility KESH added a ground-mounted solar power unit to one of its main hydroelectric stations, but the idea is to integrate a floating photovoltaic plant and a wind park as well. It is an opportunity to create a globally unique model for combining renewable energy technologies. Albania has a specific electricity production system.

What is the biggest solar power plant in the Western Balkans?

Karavasta, the biggest solar power plant in the Western Balkans, is now under construction after French company Voltalia won the project at an auction. It has another photovoltaic unit in the pipeline under the same model. The government is subsidizing the installation of solar thermal systems for households.

How big is Kesh's solar power plant?

The solar power unit on the Qyrmaq dam occupies more than two and a half hectares of 3.2 hectares in total. KESH already plans to build another one, on the Zadeja dam at Vau i Dejës. The future 8.25 MW system is envisaged to span 40 hectares, compared to 48.6 hectares of total area. The floating solar park should have 12.9 MW in peak capacity.
