We install photovoltaic systems in Cyprus for all kinds of residential properties, commercial buildings, farming premises and any other use, given that the property is suitable for the installation. Solar panels in Cyprus can be placed on flat and inclined roofs as well as on the ground.

Install solar panels in Cyprus to reduce energy bills. Save up to 80% on costs with government subsidies and sustainable solar solutions tailored to your needs.

Shop All-Purpose 300W monocrystalline silicon solar panel kit, positive and negative output up to 300W (300W solar panel kit) online at best prices at desertcart - the best international shopping platform in Cyprus. FREE Delivery Across Cyprus. EASY Returns & Exchange. How much does it cost to install solar panels in Cyprus?

The average price of installing solar panels has dramatically dropped over the last decade to almost 90%, allowing more people to afford such an investment. In Cyprus, it is estimated that it takes about 1.5 to 4 for the investment to pay off. The final price heavily depends on the specifications of your project and your needs.

What are solar panels used for in Cyprus?

Solar panels in Cyprus are used for residential, industrial and commercial properties. Other than home use, many businesses install photovoltaic panels

in Cyprus for self-consumption. That is, they use the energy the photovoltaic system generates directly, but cannot store any excess energy for following months.

Where can photovoltaic panels be installed in Cyprus?

Photovoltaic systems can be installed on flat and inclined roofs and on the ground. Our team can visit the place where you want the solar panels to be installed, evaluate the amount of space, sun exposure and possible shading and suggest the best place so that you make the most out of your photovoltaic panels in Cyprus.

Why should you buy a photovoltaic system in Cyprus?

In Cyprus, the sun shines almost all year long. You can get deductions on your electricity bill. Photovoltaics in Cyprus can increase the value of a property. Photovoltaic panels in Cyprus require minimum maintenance. The lifespan of photovoltaic panels in Cyprus can reach 25 years.

Can a non-residential solar system be installed in Cyprus?

Residents of Cyprus who haven't installed any other PV systems with any other Government Grant Scheme are entitled to apply for a non-residential solar panel project, and the panels can be installed either on the roof of the applicant's premises or on the ground. The contract between the producer and the EAC lasts 10 years.

How does a solar water pump work in Cyprus?

On a sunny day in Cyprus, the water pump can be generated directly from the photovoltaic panels and at other times the energy produced by the panels can be stored in a battery to be used when needed, for example when there is not much sun. Solar pumping is very beneficial both financially and environmentally.
