

European Solar Energy Storage

4 solar sa Vietnam

Overview

What is the solar energy potential of Vietnam?

In terms of the solar energy potential, Vietnam is endowed with unique solar resources. The total technical potential of photovoltaic power generation is high as 1,646GW, of which 1,569GW is land-based photovoltaic and 77GW is water-based photovoltaic.

Why is solar energy growing in Vietnam?

Support policies such as electricity price subsidies and tax exemptions are the key driving forces for the rapid growth of installed capacity of solar energy in Vietnam. Of course, Vietnam's current photovoltaic installed capacity is also restricted by the aging power grid that is unable to absorb green electricity.

Is Vietnam a good country for solar energy?

Vietnam leads the ASEAN region in both photovoltaic manufacturing and photovoltaic installed capacity. In terms of the solar energy potential, Vietnam is endowed with unique solar resources.
