

## European Solar Energy Storage

# Afs energy French Polynesia

## Overview

---

Who is AFS energy systems?

AFS Energy Systems is pleased to announce that we have accepted a contract to design a second 31.0 MMBTU/HR gas burner for the Musser Lumber Company in Rural Retreat, VA. In addition to being selected for the burner system AFS is overseeing thing engineering, fabrication, and installation of the entire dry biomass in feed system.

How much electricity does French Polynesia use?

Hydroelectricity accounts for 23% of the electricity mix in French Polynesia. It is the first renewable energy source in French Polynesia with an installed capacity of 49.3 MW. Solar water heaters produce hot water using solar energy. In 2019, the electricity consumption saved is approximately 22 GWh, i.e. 3% of electricity consumption.

How does AfD support Polynesia?

AfD supports Polynesia with its objectives of territorial continuity and opening up the islands. It focuses on the following sectors: Health by financing the renewal of part of Air Archipels' fleet for medical evacuations.

Does French Polynesia rely on hydrocarbons?

French Polynesia, like most island territories, is highly dependent on hydrocarbon imports. In 2019, 93.8% of energy consumed in the archipelagos came from imports of various petroleum-based fuels. The renewable energy penetration rate in power generation stood at 28.78% in 2019. This figure has remained stable over the last five years.

What is French Polynesia's energy transition plan?

French Polynesia's energy transition plan has three main objectives: Change the energy model, by gradually replacing the use of fossil fuels with renewable energies in all activities.

Is biomass a source of electricity in French Polynesia?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. French Polynesia: How much of the country's electricity comes from nuclear power?

Nuclear power – alongside renewables – is a low-carbon source of electricity.
