

## European Solar Energy Storage

# Age energy Armenia

## Overview

---

Energy in Armenia is mostly from . has no proven reserves of oil or and currently imports most of its gas from . The has the capacity to equal imports from Russia. Despite a lack of fossil fuel, there are significant domestic resources to generate . The Armenian electrical energy sector has had a surplus.

Does Armenia have solar energy?

Armenia has significant solar energy potential: average annual solar energy flow per square metre of horizontal surface is 1 720 kWh (the European average is 1 000 kWh), and one-quarter of the country's territory is endowed with solar energy resources of 1 850 kWh/m<sup>2</sup> per year. Solar thermal energy is therefore developing rapidly in Armenia.

What is Armenia's Energy Policy?

According to the International Energy Agency, imports of oil and gas continue to cover 75% of Armenia's energy needs. However, the Government of Armenia has focused its energy policy towards developing indigenous energy sources, mainly renewable, and on replacing the country's main nuclear reactor.

What percentage of Armenia's Energy is renewable?

Renewable energy resources, including hydro, represented 7.1% of Armenia's energy mix in 2020. Almost one-third of the country's electricity generation (30% in 2021) came from renewable sources. Forming the foundation of Armenia's renewable energy system as of 6 January 2022 were 189 small, private HPPs (under 30 MW), mostly constructed since 2007.

Does Armenia use natural gas?

Natural gas represents a large portion of total energy consumption in Armenia, accounting for 50% and is the primary means of winter heating in the country.

Does Armenia have a surplus electricity sector?

The Armenian electrical energy sector has had a surplus capacity ever since emerging from a severe post-Soviet crisis in the mid-1990s, thanks to the reopening of the Metsamor Nuclear Power Plant, which was built in 1979 and supplies over 40% of the country's electricity.

How much power does Armenia have?

Thus, in 2006, Armenia's power plants on average generated 678.2 MW of power, while the country's electricity consumption rate on average was 635.5 MW. Armenia has a total of 11 power stations and 17 220 kV substations.
