Akku grain Antarctica

Overview

What is akkugrain®?

AkkuGrain® is the first protective agent specially developed for the transportation and storage of lithium-ion batteries. Made from purely organic components, AkkuGrain® only reacts in the event of a thermal runaway. Curious?

Ask your questions here! When heat is released, the components of the AkkuGrain® bind toxic and flammable gases.

What is akkugrain granulate?

Environmentally friendly AkkuGrain granulate absorbs emerging liquids, toxic smoke and burning gases. Damaged vehicles can be saved and stored without further supervisory staff. Development vehicles can be transported invisibly and without problems. The containers can be secured with a seal or a lock.

Why is akkugrain a non combustible material?

At the same time, the source of the fire is cooled down so that the fire cannot spread further inside or outside the load carrier. In addition, the oxygen is displaced from the charge carrier, which suffocates the fire. AkkuGrain® is officially certified and patented as a non-combustible material.

Can akkugrain® be reused?

AkkuGrain® can be reused as often as desired after transport without thermal runaway AkkuGrain® is available in different bag sizes and as bulk material As a manufacturer, we offer you complete solutions for the transportation of lithium-ion batteries.

What can akkugrain® do for You?

AkkuGrain® is available in different bag sizes and as bulk material As a manufacturer, we offer you complete solutions for the transportation of

lithium-ion batteries. At your request, we can also develop individual solutions for lithium-ion batteries, regardless of whether they are new, defective or critically damaged.

Can akkugrain be used in water protection areas?

Application in water protection areas is possible. Dry Fire Con according to DIN 14505 and 30722-1. The transportability is preserved by the solid AkkuGrain. Permanent protection during long-term reactions of Li-Ionen-batteries. Environmentally friendly AkkuGrain granulate absorbs emerging liquids, toxic smoke and burning gases.

GRAIN , Bioprospecting in Antartica

GRAIN is a small international non-profit organisation that works to support small farmers and social movements in their struggles for community-controlled and biodiversity-based food systems. Work at the Antarctic Co-operative Research Centre in Hobart suggests that these bacteria, if fermented, could do the same work much more cheaply.

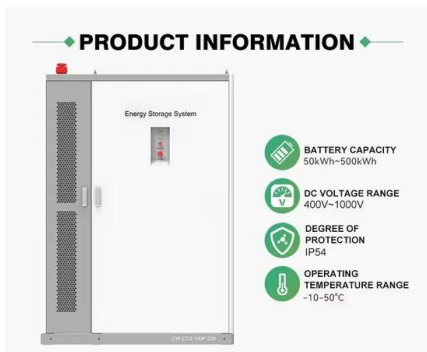

Aggies Take First Study Abroad Trip To Antarctica

Wiederwohl's oceanography students collaborated with the Fjord Phyto NASA-funded project to collect water samples to better understand phytoplankton community changes occurring in the Antarctic Peninsula. Atmospheric sciences students conducted daily weather briefings and collaborated with the international community of amateur (ham) radio enthusiasts ...

Die besten Heizjacken? (Test &

Vergleich 2024)

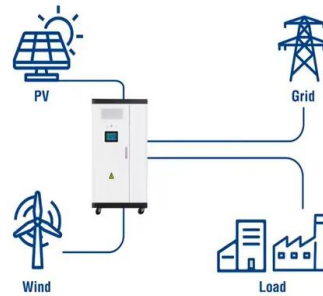

Warum wir es mögen: Der Akku der Heizjacke ist mit allen Bosch Professional Werkzeugen der gleichen Spannungsklasse kompatibel. Erhältlich ist die Jacke mit 12 V-Akku, ein 18 V-Akku kann aber als zusätzliches Zubehör erworben werden. Außerdem sorgt eine USB Schnittstelle dafür, dass auch Handys aufgeladen werden können.

(PDF) Estimating Snow Grain-Size from Landsat in Antarctica

Grain-size is an important but not well-known characteristic of snow at the surface of Antarctica. In the past, grain-size has been reported using various methods, the reliability, reproducibility and intercomparability of which is not warranted. In this paper, we present and recommend, depending on available logistical support, three

Antarctica is turning green at an alarming rate, satellite images

Parts of icy Antarctica are turning green with plant life as the region is gripped by extreme heat events, new research shows, sparking concerns about the changing landscape on this

vast continent.

GRAIN , Australia's Antarctic bonanza queried

GRAIN est une petite organisation internationale qui soutient la lutte des paysannes, des paysans et des mouvements sociaux pour renforcer le contrôle des communautés sur des systèmes alimentaires fondés sur la biodiversité

GRAIN , UN wants rules on bioprospecting in Antarctica

It says the existing Antarctic Treaty System cannot adequately regulate the possible consequences to Antarctica. The UN University's report, "The International Regime For Bioprospecting: Existing Policies And Emerging

Issues For Antarctica", is published by its Institute of Advanced Studies, based in Tokyo, Japan.

GRAIN , Companies lobby to secure patents in Antarctica

RedOrbit , 6 February 2009 . COMPANIES LOBBY TO SECURE PATENTS IN ANTARCTICA. Companies developing new products through biological discovery or "bioprospecting" are trying to file patents on Antarctic organisms or molecules for items ranging from cosmetics to medicines, putting new strains on the treaty demanding all scientific findings on Antarctica be freely shared.
