EnerG2 opens Albany plant - Oregon Business

Energy storage company EnerG2 opened a new manufacturing facility in Albany, the world's first plant dedicated to commercial-scale production of engineered carbon. ...

CONTACT US

The company, founded in 2003, developed its patented Carbon Technology Platform to enable large-scale production of carbon materials that surpass the limitations of the naturally occurring carbons traditionally used in energy storage applications. Polymer chemistry is the foundation for enerG2's market-leading innovation. enerG2 has developed laboratory ...

[EnerG2 Company Profile](#)

Energ2 is a company that manufactures and distributes carbon materials for energy storage applications. It offers lead-acid batteries, ultracapacitors, adsorbed natural gas (ANG), and ...

EnerG2 Next Generation Energy Storage

EnerG2 and its state-of-the-art scientific

approach to energy storage materials have been backed over the past seven years by the public and private sectors. Among the company's supporters: the University of Washington, the Washington Technology Center, a state-supported economic development agency that finances applications of university
