

## European Solar Energy Storage

# Algeria keds energy

## Overview

---

Can Algeria become a major exporter of green hydrogen?

Additionally, Algeria is developing an energy roadmap to expand renewable energy sources in power generation and become a major exporter of green hydrogen. The country is advancing projects to boost renewable energy power generation to 15,000 megawatts (MW), nearly 30% of the total energy mix, by 2035.

Can Algeria become a key energy supplier for Europe?

With the right strategies in place, Algeria can secure its role as a pivotal energy supplier for Europe and a leader in the global energy transition.

What is energy in Algeria?

Energy in Algeria refers to energy and electricity production, consumption, and import in Algeria. The country had a primary energy use of 462 TWh in 2009 with a consumption of 13 TWh per million persons. Algeria is an OPEC country.

What does Algeria's new hydrocarbon law mean for foreign investors?

At the heart of Algeria's energy landscape transformation is its revised hydrocarbon law (Law 13-19), introduced in December 2019. This legal framework offers significant improvements to attract foreign investors, addressing concerns over Algeria's historically rigid energy sector.

Can Algeria become a leader in the emerging hydrogen economy?

Given Algeria's geographical proximity to Europe, coupled with its renewable energy potential, the country is well situated to become a leader in the emerging hydrogen economy. The agreement not only strengthens Algeria's ties to Europe but also underscores the potential for green hydrogen to become a pillar of its future economy.

Why is Algeria a good country for energy exports?

Algeria's geographical position near Europe provides an advantage for energy exports, particularly to Mediterranean countries. Aligning with global sustainability goals, the Algerian Ministry of Energy and Mines has set targets for electricity generation, aiming for 40% from renewable sources by 2030.

## 10 years together in Kosovo

In 2013, when we started operating in Kosovo, we were convinced that in order to achieve a complete energy transformation, in addition to our professional capacities, we also needed a balance of workforce that, in the face of this challenge, had to be part of this objective. Such an electro-energetic transformation was not an easy task! Many factors showed the state ...
