# Angola power plus

## Overview

---

What type of power plug is used in Angola?

In Angola, power plugs and sockets (outlets) of type C are used. The standard voltage is 220 V at a frequency of 50 Hz. For more information, select the country you live in at the top of this page. We don't sell power plug adapters. We refer you to Amazon, where you will find a great selection of travel adapters.

How much power does Angola need?

In order to ensure a safe power supply, even in years of lower hydro flow, Angola should have 9.9 GW of installed capacity - through increasing power capacity in all sub-systems and through a strong reliance on hydro and gas (which will correspond, respectively, to 66% and 19% of installed power capacity).

How many power plants are in Angola?

Generation Capacity With a current installed capacity of approximately 5,01 GW, three power stations primarily power Angola; Laúca (1000 MW), Capanda (520 MW) and Cambambe (960 MW), as hydroelectric plants generate nearly two-thirds of Angola's electricity. Meanwhile, the Luanda OCGT power plant is the only operating gas turbine in the country.

Does Angola have a low electrification rate?

Despite high resource potential and opportunities for cross-border export, Angola's power sector faces significant challenges, including a relatively low electrification rate. \*/ ANGOLA POWER AFRICA FACT SHEET \*/ Power Africa has supported the development of electricity generation projects in Angola.

Should Angola increase access to electric power?

Increasing the access to electric power is a high priority for the Government of Angola, which has set targets of 9.9 gigawatts (GW) of installed generation

capacity and a 60% electrification rate by 2025.

What type of power socket is used in Angola?

The power sockets in Angola are of type C. The standard voltage is 220 V at a frequency of 50 Hz. Check your need for a power plug (travel) adapter in Angola.
