

European Solar Energy Storage

Api energy ltd Eswatini

Overview

What is the main energy source in Eswatini?

Hydroelectric power currently stands as one of the most prominent energy sources in Eswatini. The EEC operates four hydropower plants, constituting 15% of the country's electricity production and plans to bolster the existing infrastructure.

Why is hydroelectric power important in Eswatini?

Projects such as these conserve millions of liters of fuel throughout their lifetime and ensure year-round reliable and sustainable electrification for public facilities. Hydroelectric power currently stands as one of the most prominent energy sources in Eswatini.

Are solar panels a viable source of electricity in Eswatini?

Photovoltaic (PV) solar cells are increasingly prominent sources of small-scale electricity production in Eswatini. The government actively encourages the adoption of solar panels in residential and commercial buildings to provide both electricity and water heating.

What is Esera & how is it regulated in Eswatini?

Legal Mandate ESERA was established by an act of parliament, the Energy Regulatory Act, 2007, which gives it the statutory right to regulate the electric power industry in Eswatini. The establishment of ESERA by legislation enhances the credibility of the institution and is likely to have a positive impact on investor and consumer confidence.

Why is Eswatini electrified?

The electrification of Eswatini promises its energy-deprived citizens more than just basic household power. It heralds a new era of economic expansion, immediately offering job prospects in construction and laying the groundwork for internet-driven startups to flourish.

Is Eswatini a sustainable country?

A nation that has long relied on neighboring South Africa and Mozambique for unsustainable fossil fuel-based electricity imports, renewable energy in Eswatini is quickly diversifying. The transformative journey culminated at the COP26 conference, where Eswatini committed to an ambitious 50% surge in renewable energy production by 2030.
