If you want this to last "several days" (let's say two), then the allowable power is about 2800 kW, not 30kW. $30 \text{ kW} / 3744$ is 8 watt per cell, or about 2 amps. While this is not, by itself, an unreasonable number, it makes no sense given your stated battery capacity. You'd expect a lithium ion cell to handle at least a 1C rate, or 5 amps.

250/500 kW Battery System , Saft , Batteries to energize the world

For directed energy and other applications requiring very high pulse power, Saft offers a scalable and compact 250-500 kW battery system. The 250 kW system is a building block for larger, higher power 500 kW, 750 kW and higher systems, with independent 250 kW outputs. This very high power battery system has demonstrated long life, safety and

Big Breaking Down the Benefits of 30kw Battery

Among the leading options, two stand out: the 30 kW battery storage system and the DC coupled battery storage system. Let us embark on a journey to explore the potential of these systems, understand their applications, and unveil the advantages that lie within, all while striving to achieve significant cost savings.
