Burundi: Project development consultants sought , African Energy

Songa Energy Burundi is seeking expressions of interest from consultants to carry out development studies for the 8MW Mule037 and 1.07MW Ruvyi102 hydropower projects, which are being co-developed with East African renewables developer Virunga Power. The studies will also look at solar hybridisation.

ENVIRONMENTAL & SOCIAL ASSESSMENTS

Mule037 Hydropower Plant Project: ESIA
Burundi's electricity production relies heavily on hydropower, yet this valuable resource remains largely untapped. With 10-12% of the population having access to electricity, there's a critical need to bolster the country's energy infrastructure. It is within this context that the Mule037 project emerges, aiming to produce 9.00 MW of much ...

Kevin Crew

Last week was a very busy one for the Songa Energy team in Burundi, with our Director of Engineering (Kevin Crew) in country to visit our sites and to finalize important aspects of the engineering design and feasibility study. Kevin and Dan Brose also hosted a potential investor, who endured long and bumpy drives across Burundi to visit

Hardship pushes energy-starved Burundi towards off-grid ...

A permanent economic crisis characterised by inflation and fuel shortages is driving an unplanned green revolution in Burundi as consumers flee one of Africa's worst performing utilities for the long-term security of off-grid solar systems. But even in this unforgiving environment some utility-scale projects are advancing thanks to determined international support.

Community Development

Burundi ranks 3rd worst in the world for access to electricity, according to the World Bank. Less than 12% of the population is able to access electricity in their homes and most of the country lacks any access to the national grid. 95% of the available electricity is utilized in the capital city of Bujumbura. [...]
