Overview

What types of energy storage are available in Australia?

purchase in Australia. lithium-ion technologies. installed indoors. This report is a comprehensive analysis of the Australian energy storage market, covering residential, commercial, large-scale, on-grid, off-grid and micro-grid energy storage.

How many large-scale energy storage projects are there in Australia?

The report identifies 55 Australian large-scale energy storage projects which are either existing, planned or proposed. Excluding pumped hydro, these represent over 4 GWh of storage. 9 gigawatts (GW) of capacity have been completed, planned or are in the pipeline. Of those, 19 have been completed and another 36 have reached financial close.

How many Australians are working in energy storage?

Our survey found that today more than 2,000 Australians are directly employed in the energy storage sector. Under the high-growth scenario outlined in this report, more than 35,000 Australians could be working directly or indirectly in the energy storage industry in 2020.

What is the Australian energy update dataset?

It is updated annually and consists of historical energy consumption, production and trade statistics. The dataset is accompanied by the Australian Energy Update report, which contains an overview and analysis of the latest trends. Latest publications: Previous publications:
