Australian petroleum energy storage

Overview

How is energy stored in Australia?

Currently storage of electrical energy in Australia consists of a small number of pumped hydroelectric facilities and grid-scale batteries, and a diversity of battery storage systems at small scale, used mainly for backup. To balance energy use across the Australian economy, heat and fuel (chemical energy) storage are also required.

Is energy storage a viable solution to Australia's energy security and reliability needs?

Energy storage is both a technically feasible and an economically viable approach to responding to Australia's energy security and reliability needs to 2030, even with a high renewable's generation scenario.

Which energy storage technology is best for Australia's energy needs?

The CEC said emerging LDES technologies coupled with the energy storage systems in place, would be the best suite to appropriately manage Australia's needs. In March this year, the ARENA held an Insights Forum which covered energy storage and technologies that can bring system security to the grid.

Can Australia hold oil reserves offshore?

Under International Energy Agency obligations, Australia and other member countries are required to hold oil reserves equal to 90 days of the previous year's net imports and are permitted to hold these reserves offshore where a bilateral arrangement is in place.

Are liquid fuels the future of Australia's energy mix?

Australia relies on liquid fuels for more than half of our final energy demand. While the use of alternative fuels and new vehicle technology is increasing, traditional liquid fuels are still expected to play an important role in Australia's energy mix over the coming years.

Could energy storage have prevented the South Australian electricity blackout?

Adequate, appropriate and available (i.e. connected to the grid) energy storage in South Australia would have likely prevented the South Australian electricity blackout of 28 September 2016 as well as the need for emergency load shedding in New South Wales and South Australia in February 2017.
