

## European Solar Energy Storage

# Azure energy Austria

## Overview

---

What is energy in Austria?

Energy in Austria describes energy and electricity production, consumption and import in Austria. Austria is very reliant on hydro as an energy source, supported by imported oil and natural gas supplies. It is planned by 2030 to become 100% electricity supplied by renewable sources, primarily hydro, wind and solar. [citation needed].

What does austriaenergy do?

Working in harmony with nature and generating competitively priced renewable energy; we are entering the next stage of the energy transition by producing green hydrogen (H<sub>2</sub>) and green ammonia (NH<sub>3</sub>). AustriaEnergy has significant experience in the site development and technology integration of renewable energy projects.

What is Austria's energy plan?

Austria is very reliant on hydro as an energy source, supported by imported oil and natural gas supplies. It is planned by 2030 to become 100% electricity supplied by renewable sources, primarily hydro, wind and solar. [citation needed] The Austrian energy plan made in 2020 has the following targets:.

What is the largest energy company in Austria?

OMV AG, a multinational integrated oil, gas and petrochemical company, is the largest energy business in Austria, with a turnover of €36 billion in 2021.

Who is Austria Energy Group?

The Austria Energy Group was founded in Vienna, Austria in 2006, where its headquarter is located with subsidiaries and offices in Europe and Latin America. Since its commencement, the Group has been focused on the site development and technology integration, construction (EPCM), operation and management of renewable power plants.

Does Austria have an above-average gas supply?

The Austrian Energy Agency has analysed which energy policy strategies, decisions and measures from 1945 to 2020 led to Austria's above-average exposure to gas supplies and which lines of argument have become established over the decades. Last but not least, it shows which conclusions can be drawn for the future and used for a new risk assessment.
