Solar Metal Roofs

The solar modules can be installed on a metal roof system with no penetrations into the roof, allowing the metal roofing warranty to remain intact. Nearly 80% of PV installations occur on existing construction. The service life of a metal roof system is compatible with that of a solar array. PV systems typically last 20-25 years.

Energy Design Installation ...

It's easy to slap a few solar panels on a roof. But will it produce power? Is it just a decoration on your roof and a few years later, you have rain falling in your bedroom? Safety and Performance comes from strict code compliance and careful design that takes into consideration your home's conditions. We recommend you look at our "FAQ" section.

F.A.Q. -- Bahamas Energy & Solar Supplies

A: While solar panels can be installed on almost any type of roof, there is an ideal roof for a solar installation. If done properly, a solar installation should last 25 - 30 years. Consequently, a roof should be prepared to last the same period of time. It is worth noting that a solar panel installation can extend the life of your roof.
