

European Solar Energy Storage

Basque post office energy storage

Overview

Could basquevolt be Europe's first solid state battery Gigafactory?

Basquevolt, Europe's first solid state battery gigafactory, is a huge challenge yet an even bigger opportunity, says Basque energy storage research institute head Nuria Gisbert. Last Updated on Dec 3, 2023 by About Basque Country.

Who are the investors in the Basque Energy Project?

10/06/2022 The founding consortium of investors in the project, promoted by the Basque Government, includes Iberdrola, CIE Automotive, Enagás, EIT InnoEnergy, and CIC energigUNE, whose research has facilitated the formation of this initiative.

Why should you invest in basquevolt?

Basquevolt is a European benchmark in the development of solid-state batteries. The experience of the companies that make up the initial group of investors ensures Basquevolt is in a very important competitive position both in the battery race, where there are also important opportunities for collaboration, and in the storage market.

What is the basquevolt project?

Nevertheless, given how important and interesting this news is, we had to share it. The Basquevolt project, which expects an investment of €700 million, got started two years ago in secret, and its main goal is setting up a production line to make solid-state batteries by 2027.

Who are the founding shareholders of the basquevolt?

This is one of the main objectives set out in the BASQUEVOLT's articles of association, in which the Basque Government, Iberdrola, CIE Automotive, Enagás, EIT InnoEnergy, and CIC energigUNE all feature as founding shareholders.

How long will it take basquevolt to launch a production line?

In this sense, BASQUEVOLT plans to launch the first production line within 4 years, supported by an investment of more than 700 million euros, which will be able to generate more than 800 direct jobs.

Basque post office energy storage

Basque Country, a hub for the energy storage industry

In recent years, the Basque Country has managed to position itself as a reference in the energy storage sector; not only at national level, but also at community level, thanks to the large entities that make up its industrial and scientific fabric around one of ...

Basque Solid State Battery Initiative Launched

Specifically, Basquevolt aims to develop in a sustainable way the best materials and battery cells to enable the mass deployment of electric transport, stationary energy storage including hybridisation with hydrogen-gas ...

BASQUEVOLT, the Basque initiative for the production of solid ...

Specifically, BASQUEVOLT aims to develop - in a sustainable way - the best materials and battery cells to enable the mass deployment of electric transport, stationary energy storage (including hybridisation with hydrogen-gas systems), and advanced portable devices.

Basque Solid State Battery Initiative Launched

Specifically, Basquevolt aims to develop in a sustainable way the best materials and battery cells to enable the mass deployment of electric transport, stationary energy storage including hybridisation with hydrogen-gas systems and advanced portable devices.

BASQUE COUNTRY

a 19th-century post office in Spain's Basque Country now doubles as a community energy storage hub. While you might associate post offices with stamps and parcel queues, the Basque region is rewriting the rulebook through its groundbreaking post office energy storage initiative.

Iberdrola takes a stake in Basquevolt, the solid-state battery ...

Specifically, Basquevolt aims to develop - in a sustainable way - the best materials and battery cells to enable the mass deployment of electric transport, stationary energy storage - including hybridisation with hydrogen-gas systems - and advanced portable devices.

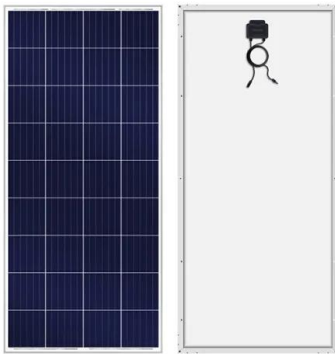

Basque gigafactory can unlock the holy grail of energy ...

Europe's first battery gigafactory is a huge challenge and opportunity, says Basque energy storage research institute head Nuria Gisbert.

Solid state battery innovation centre unveiled in ...

"Our dedicated research and development team has successfully overcome technical challenges to deliver a cost competitive solid state battery technology that offers a very high energy density.

BASQUEVOLT

Specifically, BASQUEVOLT aims to develop - in a sustainable way - the best materials and battery cells to enable the mass deployment of electric transport, stationary energy storage (including hybridisation with hydrogen-gas systems), and advanced portable devices.

Basquevolt, the Basque initiative to make solid-state batteries

Basquevolt, Europe's first solid state battery gigafactory, is a huge challenge yet an even bigger opportunity, says Basque energy storage research institute head Nuria Gisbert.
