## Overview

---

What types of battery tripping units are available?

We supply a comprehensive range of 24V, 30V, 48V, 50V, 110V or 240V DC battery tripping units (BTUs) and associated monitoring systems to suit your site. Battery tripping units are used in industrial areas where the application of a DC supply in substations and switch rooms is required for the protection and tripping of circuit breakers.

What is a battery tripping unit (BTU)?

Battery Tripping Units (BTUs) are primarily used in industrial systems to protect against overcurrent conditions. Providing a high current load for a short amount of time, battery banks will open or trip breakers in the event of a fault being detected in the system. In all safety systems it's critical to select the correct battery charger.

What type of battery for a switch tripping unit?

The Battery technology shall be Low Maintenance Nickel Cadmium battery cells for this application with a 24Ah capacity. Replacement Cells ONLY for a Switch Tripping Unit utilised for NON-STANDING LOAD applications consisting of Sealed Secondary Battery cells complete with a charging/monitoring/alarm facility.

What is a standard switch tripping unit?

Standard Switch Tripping Unit for STANDING LOAD applications consisting of Sealed Secondary Battery cells complete with a suitable charging/monitoring/alarm facility. This unit will have the facility to recharge the battery cells and therefore will be connected to an external AC Power source within the operating environment.

What is a general switch tripping primary cell battery?

General Switch Tripping Primary Cell Battery complete with a

monitoring/alarm facility. This unit will not have the facility to recharge the battery cells and therefore will not be connected to an external AC Power source within the operating environment.

How does a battery trip unit work?

This is how your Battery Trip Unit works: If a fault is detected within the supply, a Battery Trip Unit is energised, and will trip the system to cut off the supply to the industrial equipment prior to any failure taking place.
