Belarus futuri power

Overview

How will the transition of power work in Belarus?

The transition of power—if it takes place before 2030—will follow a tightly controlled route, delegating significant powers to a handpicked successor to maintain the political status quo. The new Belarusian leadership will be selected in a way that allows avoiding a more aggressive reaction from Moscow.

What will be the future of Belarus until 2025?

Executive Summary At least three trends will define the future of Belarus until 2025. The role of the state in the economy will continue to decrease. Belarusian foreign policy will continue to become more sovereign.

What will the new Belarusian government look like in 2030?

The new Belarusian authorities, should they be in place by 2030, will maintain the previous political model of top-down governance. At the same time, the dominance of state-owned assets in the economy will diminish. This model will somewhat resemble contemporary Kazakhstan but with a lower standard of living.

How does the situation in Belarus develop?

Bearing all these reservations in mind, there are a number of rather predictable and consistent patterns in how the situation in Belarus develops. Russian pressure and the perceived threat of escalation narrow Belarus's margin for maneuver in its foreign policy.

How many Belarusian workers will be employed by 2030?

At its current pace of contraction, based on average rates recorded over the last decade, by 2030 the state-owned sector will likely employ no more than 15–30 percent of Belarusians. While this is not a small number, it only faintly resembles “the Communist reservation” the Belarusian economy was

considered to be in the 1990s and 2000s.

Will Russia tolerate Belarus?

It is important to note that in any probable scenario, Russia would hardly tolerate Belarus drifting toward European or Euro-Atlantic integration, the stoppage of oil and gas transit via Belarusian territory, or any serious discrimination against the Russian language and residents in Belarus.
