Proposal A National Energy Policy for Belize

Belize is abundant in energy resources, particularly biomass (forestry), hydroelectricity, solar and wind. Although these resources could play a central role in sustaining development,

the nation remains highly dependent on imported energy sources. Furthermore, access to energy in rural areas is inadequate and

Belize

Belize is developing sustainable energy project policies, which range from expanding biomass power to solar-based distributed power systems. Over the last 20 years, Belize has invested in domestically produced energy to strengthen and stabilize its energy sector. Investments in hydropower and recently in biomass, solar, and liquified petroleum

Energy in Belize

Belize currently imports 100% of its fossil fuel use (Launchpad Consulting, 2003). Under the San Jose Pact, which Belize signed onto in 1988, Mexico and Venezuela signed a treaty obligating them to offer a concessionary credit from 20-25% of the purchase price of their oil exports. In 1991, both countries increased the oil supply offered under this agreement (Belize - Mining ...
