In Norway, around 97% of the country's energy already comes from hydro-power, though sustainable home design extends well beyond the concept of clean energy. Most homes, highlighted by National Geographic, are equipped with smart metres, which empower homeowners to harvest solar energy, store it, and sell it back to energy companies.

Solar panels turn the sun's rays into energy which can be sold to the power grid or used for your own home. Figures from The Norwegian Water Resources and Energy Directorate (NVE) show that solar power capacity in Norway has increased ten-fold since 2015. Despite this, the Scandinavian country still lags behind others.
