Big solar panel Cabo Verde

Overview

Will Cape Verde build a solar power plant?

The government of Cape Verde is launching a call for expressions of interest for the construction of solar photovoltaic power plants on four islands of the archipelago. These infrastructures are being built as part of a project co-financed by several development partners. Interested companies have until 30 March 2023 to apply.

What is Cape Verde's 5 MW solar power plant?

The 5 MW solar power plant, located on the island of Santiago, was built with the support of the World Bank and the European Investment Bank (EIB). The project was part of Cape Verde's efforts to transition to a more sustainable and resilient energy system.

How will the reiup project impact Cape Verde?

The REIUP project is expected to contribute significantly to achieving this target. In recent years, Cape Verde has made significant progress in promoting renewable energy sources. The country has been investing in wind and solar energy projects, and in 2019, inaugurated the largest solar power plant in West Africa.

Can Cape Verde generate 50% of its electricity from renewable sources?

Cape Verde has set an ambitious target to generate 50% of its electricity from renewable sources by 2025. The REIUP project is expected to contribute significantly to achieving this target. In recent years, Cape Verde has made significant progress in promoting renewable energy sources.
