Crouch Gait: Causes, Issues, Treatments - Bionic Power Inc.

Crouch gait--reducing it, correcting it--is one of our primary goals at Bionic Power. The Agilik, our smart orthotic device, has been designed to curtail and correct crouch gait, a common disorder among people with cerebral palsy (CP), spina bifida, and other knee-extension-deficiency disorders. Crouch gait is clinically described as

Getting into an Agilik crouch gait clinical trial

Bionic Power's internal assessment of the Agilik's technology began long before the Agilik even existed as a product. We started testing the technology used in today's Agilik device several years ago, in field trials with the Canadian, U.S., and Israeli militaries. This precursor to the Agilik was a wearable leg-based exoskeleton.

[Bionic Power Inc.](#)

Bionic Power Inc. () is a Canadian, early stage, medical device company that addresses the large and rapidly growing markets for pediatric and adult mobility assistance.

Robotic resistance - Bionic Power Inc.

In recent years, there has been a growing interest in creating wearable robotic exoskeletons for children, especially those with conditions like cerebral palsy (CP). The Agilik smart orthosis is one of these pediatric ...

A Primer on Bionic Power, the Agilik, and Wearable Devices - Bionic ...

Bionic Power designed the Agilik to reduce crouch gait, a common symptom across all of the disorders we mention above. Crouch gait gets its name from how it appears--as if the person is crouching while walking. The person crouches because their knees and hips are bent (in flexion), while their ankles bend forward.

Robotic resistance - Bionic Power Inc.

In recent years, there has been a growing interest in creating wearable robotic exoskeletons for children, especially those with conditions like cerebral palsy (CP). The Agilik smart orthosis is one of these pediatric devices.

These exoskeletons hold the promise of improving various aspects of walking, such as step length, walking speed, and muscle activity.
