[BlueNova Energy: Battery delivery](#)

BlueNova Energy: Battery delivery Customer service does not exist. 50% upfront payment is required to get them to start their processes to produce a specific battery. I was subsequently required to pay the balance to get the specific battery delivered; over the past two weeks after that payment I have received only excuses from the salespersons

Is my MPPT Output Power limited by my BlueNova battery?

Energy Meter ET112; The maximum charge current that the BlueNova battery can handle, is 50A (Discharge current of 100A). I noticed that the output power of the MPPT is limited to about 2700W, which equals a battery current of 50A, see the screenshots below. Victron Energy and BlueNova Energy LiFePO4 Batteries. 0 Likes 0 · carel-landman

Bluenova Battery BMS Not Connected

I have 3 sites which have been installed over the past month which randomly disconnect from the battery BMS. All of the sites have 3 x 15kva quattros and Bluenova Batteries. Randomly the batteries disconnect however resetting the battery does not solve the issue. Only resetting the Cerbo GX allows the battery to be redetected.

Victron Energy and BlueNova Energy LiFePo4 Batteries

The BlueNova Energy range is supplied with a

BMS as standard on all current models of batteries . See the BlueNova Energy product page for more details on the various options. 3. Wiring of Can.Bus cable between BlueNova Energy and GX device.

SBB , Single Box Battery

SBB(TM) batteries have been developed to allow for the easy installation of 14.5kWh of high performance battery capacity in single-module installations as well as for expanded capacities in increments of 14.5kWh. Up to 9 x SBB(TM) modules can be connected in parallel for a total installed capacity of >130kWh. The integrated BMS in SBB(TM) batteries is a completely redesigned ...
