

## European Solar Energy Storage

# Botswana sunstream energy

## Overview

---

Does Botswana have a good electricity supply?

According to Statistics Botswana, local electricity generation and distribution has showed a slight improvement, increasing by 10.2 percent from 807,943 MWh during the fourth quarter of 2022 to 890,655 MWh during the first quarter of 2023. The increase was attributable to the performance improvement of Morupule A and B power stations.

Is natural gas a good investment in Botswana?

Substantial natural gas reserves (coalbed methane) exist in Central and Northeast Botswana. Once fully developed, the natural gas deposits could generate substantial downstream opportunities for new natural gas intensive equipment and services. Botswana Department of Customs and Excise. This is a best prospect industry sector for this country.

What is the storage capacity of strategic reserves in Botswana?

Botswana's strategic reserves storage is also not yet up to international standard; storage capacity is approximately 18 days compared to the international standard strategic storage capacity of 90 days. Commercial buffer stock stands at less than five days of national consumption compared to the international standard of 14 days cover.

Does Botswana import crude oil?

Botswana is heavily reliant on imports of refined petroleum products, particularly from South Africa as it does not have any proven crude oil reserves or refineries.
