# Bouvet Island positive energy

## Overview

---

Bouvet Island is an uninhabited volcanic island and dependency of Norway. It is a protected nature reserve, and situated in the South Atlantic Ocean at the southern end of the Mid-Atlantic Ridge, it is the world's most remote island. Located north of the Antarctic Peninsula, Bouvet Island is not part of the southern region covered by the Antarctic Peninsula.

Where is Bouvet Island?

Bouvet Island (/ 'bu:veɪ / BOO-vay; Norwegian: Bouvetøya [bʊ'vè:œyɑ]) is an uninhabited subantarctic volcanic island and dependency of Norway. It is a protected nature reserve, and situated in the South Atlantic Ocean at the southern end of the Mid-Atlantic Ridge, it is the world's most remote island.

Is Bouvet Island a biotic exchange Island?

Especially worth mentioning is the island chain of the Scotia Arc, which via the West Wind Drift and a system of eddies is continuing to support to some extent the biotic exchange between areas north and south of the Polar Front. Bouvet Island is among the least studied islands of the Southern Ocean (Watkins et al. 1984 ).

Could Bouvet Island expand eastward?

Bouvet Island is among the least studied islands of the Southern Ocean (Watkins et al. 1984 ). Its remote situation within the ACC/Westwind Drift raised speculations as to a possible eastward expansion of the South American biogeographic provinces.

How did Bouvet Island become a dependency?

The expedition carried out aerial photography of the island and was the first Antarctic expedition to use aircraft. :64 The Dependency Act, passed by the Parliament of Norway on 27 February 1930, established Bouvet Island as a Norwegian dependency, along with Peter I Island and Queen Maud Land.

How far is Bouvet Island from Antarctica?

Bouvet Island is one of the most remote islands in the world. The closest land

is Queen Maud Land of Antarctica, which is 1,700 km (1,100 mi) to the south, : 58 and Gough Island, 1,845 km (1,146 mi) to the north.

How did Bouvet Island get its name?

At that point, the island was given its current name of Bouvet Island ("Bouvetøya" in Norwegian). In 1930, following resolution of a dispute with the United Kingdom over claiming rights, it was declared a Norwegian dependency. In 1971, it was designated a nature reserve.

## Iceland is closing the circle on geothermal

Around a century ago, the country undertook the challenge of transitioning from fossil fuels to geothermal, and today Iceland gets more than 70% of all its energy from geothermal sources. According to Iceland's National Energy Authority, that transition for home heating alone saves the country around 3.5% of its gross domestic product.

## Energy and Utilities Industry

The energy transition is a generation-defining challenge. But we believe it's not just what it averts, but what it enables in our economy and society, that matters. We envision a world in which energy is clean, affordable and abundant, powering a new wave of industrial growth and social opportunity.. The energy industry's transition to clean energy is a fundamental enabler for ...
