British Indian Ocean Territory solar panel monthly payment

Overview

How long does it take for solar to pay back?

The higher your monthly savings on power bills from solar is, the quicker your initial investment would be repaid and the higher your ROI would be. Typically, commercial & industrial consumers should expect payback in 3 - 5 years and residential consumers should expect payback in 5- 7 years.

Does your solar system pay for itself?

At Jackson Solar, we believe that a solar system should pay for itself. In order to ensure this reliably, it must pay for itself within its warrantied period.

What is the payback period for a solar PV system?

The payback period for your solar PV system stands for the amount of time it takes for your initial investment in the solar system to be recovered from the savings it yields. The Return on Investment (ROI) refers to the effective returns that your investment would generate throughout the life of the solar system.

What is the return on investment (ROI) of solar?

The Return on Investment (ROI) refers to the effective returns that your investment would generate throughout the life of the solar system. The higher your monthly savings on power bills from solar is, the quicker your initial investment would be repaid and the higher your ROI would be.

How much does it cost to install a solar system?

An 8 kilowatt solar system should cost you no more than about \$17,500 in total including installation.
