## Overview

---

Bulgaria is introducing a law that would eliminate the administrative procedure for households and firms to install renewables on buildings – essentially rooftop solar panels, though they won't be able to deliver any surpluses to the grid for now.

Bulgaria is introducing a law that would eliminate the administrative procedure for households and firms to install renewables on buildings – essentially rooftop solar panels, though they won't be able to deliver any surpluses to the grid for now.

The National Assembly of Bulgaria has adopted changes to the territorial planning law to simplify and speed up the installation of solar panels for the production of energy for self-consumption. Currently, the procedure to install solar panels and become a prosumer can stretch to one year, but now it is expected to accelerate, local media reported.

rooftop PV systems of up to 20 kW capacity, installed on small residential buildings (houses), which are solely for self-consumption, may be installed based on a construction assessment. Certain limitations may apply depending on the planning/zoning status of the underlying land (i.e. if the land is 'urbanised', the development specifics of the .

An investment project will no longer be required when installing photovoltaic systems with up to 20-kilowatt (kW) power on building roofs. This is foreseen by changes to the Spatial development Act (SDA), adopted in the second reading by the Parliament.

Homeowners can apply for financial support for the installation of rooftop solar PV systems of up to 10 kWp, which may be paired with battery energy storage systems. The PV systems no larger than 10 kWp will be financed up to 70% with the maximum sum of BGN 15,000.
