**SMART GRID & HOME**

## Overview

---

Why does Burkina Faso need electricity?

The country has one of the world's lowest rates of electrification. Because of a shortage of installed energy generation capacity, Burkina Faso needs to import electricity from neighbouring states. Urbanisation, structural changes to the economy and recent strong GDP growth have increased demand for energy.

Where is the new solar energy plant located in Burkina Faso?

Located some 250km south east of the nation's capital city of Ouagadougou, near the town of Pâ, the new solar energy plant will supply all the electricity it produces to Burkina Faso's national power utility, La Société Nationale D'électricité Du Burkina Faso (SONABEL).

What are the different types of energy transformation in Burkina Faso?

One of the most important types of transformation for the energy system is the refining of crude oil into oil products, such as the fuels that power automobiles, ships and planes. No data for Burkina Faso for 2021. Another important form of transformation is the generation of electricity.

How much does eaif give to Burkina Faso?

EAIF lends €29 million to support the construction of 30MW solar plant to supply the national grid, marking the 20th clean energy project for EAIF. The West African country of Burkina Faso is to get a new large-scale renewable energy plant, it was announced today, 15 th March.

Does Burkina Faso have energy issues?

In Burkina Faso's Poverty Reduction Strategy Paper (PRSP) there is no specific mention of energy or environment issues. The current version (2009-2011) has chapters on " reduction of pollution " and on " sustainable management of natural resources " without reference to energy issues.

Did Burkina Faso import energy?

Burkina Faso did not import energy. Energy sources, particularly fossil fuels, are often transformed into more useful or practical forms before being used. For example, crude oil is refined into many different kinds of fuels and products, while coal, oil and natural gas can be burned to generate electricity and heat.
