

European Solar Energy Storage

Cambridge power Curaçao

Overview

What is Curacao's energy policy?

In 2009, Curacao developed an energy policy document, which sets out general guidance and governing principles for further study of energy issues.⁴ It suggests the goal of reducing energy consumption by 40% by 2020 and encourages the investigation of combining wind power with storage to provide 100% of the island's energy needs.

Why does Curacao use wind energy?

Curacao's long history with wind energy has provided it with valuable experience in integrating variable energy resources into the electrical system while also demonstrating the value of avoiding petroleum-based electricity generation.

Does Curaçao need more energy?

It appears the world has an insatiable appetite for energy – and Curaçao is no exception. Aqualectra recognizes the need to continuously stay ahead of the game in order to meet the current energy demands of Curaçao's population while anticipating future growth requirements.

Will Aqualectra revolutionize energy management in Curaçao by 2030?

As a part of Aqualectra's ongoing efforts to continue improving its services and better serve the people of Curaçao, this agreement aims to fully revolutionize energy management in Curaçao by 2030, ensuring reliable, affordable, and sustainable energy for the island.

How many wind turbines are there in Curacao?

Curacao features two of the oldest but most productive wind energy installations in the Caribbean. The first installation, a 12-turbine, 3-MW facility, was placed in service at Tera Kora in 1993.¹⁵ This was followed by an 18-turbine, 9-MW installation at Playa Kanoa in 2000.

Does Curacao have a net metering program?

In 2011, Curacao launched a net metering program for distributed wind and solar generation systems.¹¹ Residential systems smaller than 10 kilowatts (kW) and commercial systems smaller than 100 kW were eligible to participate. At the same time, large commercial customers could apply for a feed-in tariff for systems up to 1 MW in size.

Cambridge Power secures planning permission for first RDP project

Renewable energy developer Cambridge Power has secured planning permission to deliver a battery storage project, the first under UK Power Networks' (UKPNs) Regional Development Programme (RDP). The 100MW battery energy storage system (BESS) will be in Staploe, Bedfordshire, adjoining the Eaton Socon Grid Substation.
