# Cameroon ascentia resources

## Overview

---

What are the natural resources of Cameroon?

Cameroon has natural resources including petroleum, bauxite, and iron ore. The country's mining industry is largely underdeveloped. Bauxite, petroleum, uranium, cassiterite, cobalt, gold, iron ore, lignite, and nickel are some of the limited exploited mineral resources in Cameroon. In 2011, its GDP was \$47.86 billion.

Is there gold in Cameroon?

There is some gold in eastern Cameroon, and cassiterite occurs in the Darlé River valley in the northeast. Other resources include iron ore (found at Kribi), uranium, rutile, nickel, and manganese. Capital, Population, Government. Petroleum deposits were known to exist in Cameroon as early as the 1950s.

Which two uranium projects were explored in Cameroon in 2010?

In 2010, the uranium projects that were explored were the Kitongo deposit and the Lolodorf deposit. Cameroon's mineral resources totally belong to the government, and any mineral prospecting, exploration, and development activities require a permit.

Is Cameroon a deterrent to foreign investment?

Cameroon's mineral resources belong to the government, and any prospecting, exploration, and development activities require a permit. The general global opinion is that Cameroon's business policies and conditions are poor and a deterrent to foreign investment. Cameroon's mineral resources totally belong to the government.

Why is Cameroon a major producer of bauxite and kyanite?

Large amounts of kyanite (an aluminum silicate) and bauxite are deposited at Minim-Martap and Ngaoundéré on the Adamawa Plateau, and Cameroon's cobalt deposits are significant enough to make it a major world producer. The

industry needed to exploit the country's bauxite and cobalt resources was in development in the early 21st century.

Where is natural gas found in Cameroon?

Natural gas deposits have been located but remain unexploited because of the high investment costs. Hydroelectricity provides the vast majority of Cameroon's power supply, although thermal plants are also in use. The main source of hydroelectric power is the Sanaga River; the chief installations are at Edéa, on the Sanaga Falls, and at Song-Loulou.
