

European Solar Energy Storage

Can portable energy storage power supplies be mailed

Overview

Learn about USPS guidelines on hazardous materials (HAZMAT) or dangerous goods, what it means if an item is restricted or prohibited, and if you may ship food, batteries, alcohol, hand sanitizer, liquids, marijuana, or tobacco through the mail.

Learn about USPS guidelines on hazardous materials (HAZMAT) or dangerous goods, what it means if an item is restricted or prohibited, and if you may ship food, batteries, alcohol, hand sanitizer, liquids, marijuana, or tobacco through the mail.

The good news: lithium-based power stations and solar generators can absolutely be shipped globally through specialized carriers like DHL, FedEx, and UPS—provided you follow specific protocols.

Yes, but power banks are considered standalone lithium batteries. You must follow USPS rules for single-piece battery shipments, including correct labeling, secure packaging, and potential restrictions on service type or destination.

Lithium battery shipping with USPS may seem challenging, but with the right information, it can be a smooth process. This guide offers essential information for shipping batteries, packaging, prohibited items, labeling, and international considerations.

According to the prediction of the China Chemical and Physical Power Industry Association, by 2026, the global shipment of portable energy storage products will exceed 30 million units, with a total amount of 88.23 billion yuan. Can I ship batteries with USPS?

Let's simplify the process and make shipping batteries with USPS hassle-free. The short answer is yes but with strict conditions. USPS battery shipping allows you to ship it under certain conditions, but there are still some types of batteries that cannot be shipped. The following introduces nonmailable and mailable situations:.

Are power banks considered standalone lithium batteries?

Yes, but power banks are considered standalone lithium batteries. You must follow USPS rules for single-piece battery shipments, including correct labeling, secure packaging, and potential restrictions on service type or destination. Our articles make government information more accessible.

Can I ship lithium batteries overseas?

For shipping lithium batteries with USPS overseas, you can ship a maximum of 4 cells or 2 batteries that are installed in the new or certified refurbished equipment or device it operates, without any lithium battery markings. However, individual batteries are prohibited from USPS international shipping.

Can a battery be mailed?

Multiple cell batteries inside the housing or casing exceeding 100Wh for each battery are nonmailable. Damaged/recalled individual batteries are prohibited and need approval. Domestic shipping via air: Maximum 8 cells or 2 batteries with or installed in the new or Manufacturer Certified Refurbished (MCR) equipment in the same package.

Does shipping electronics require extra care?

Shipping electronics requires extra care, especially when batteries are involved. From packaging guidelines to USPS requirements, many factors ensure your device travels safely and complies with postal regulations. When sending electronic devices through the mail, two major concerns exist:.

Are electronic devices safe to send through the mail?

From packaging guidelines to USPS requirements, many factors ensure your device travels safely and complies with postal regulations. When sending electronic devices through the mail, two major concerns exist: Delicate internal components can be damaged if not properly cushioned.

Can portable energy storage power supplies be mailed

Shipping Restrictions & HAZMAT
