Overview

Is selling solar power profitable?

Selling solar power is not only profitable but also a noble obligation. Once you install roof solar panels, you use less grid energy, which is highly expensive. Using this expensive energy less, means you reduce your electricity bills. In addition, you earn by selling the excess solar energy you sell to the grid.

Can you sell solar power without battery storage?

Without battery storage, this excess electricity flows back into the utility grid for other customers to use. This two-way relationship between your property and the electrical grid makes selling solar power possible. Here's how it works: The most common method for selling solar energy back to the grid is through net metering.
