### The Electric Power System of -CANADA

Power System of CANADA 4 Canada - Basic Facts  
 o Area: 9 984 670 km<sup>2</sup> (Second largest country in the world by land mass)  
 o Population: 37,831,018 (October 2020)  
 o Number of electricity customers: 15,420,450  
 o Average interruption of electricity: 4.97 hours (2016)  
 Power system of Canada 2017 Generation Mix, NRCAN

### Inżynieria Elektryczna

Protection settings are reason why your circuit breakers trips faults. Setting up protection settings is next step after Protection Coordination Study It usually requires protection testing and test report. This apply to: ACB-Air Circuit Breakers with digital trip units; MCCB-Moulded Case Circuit Breakers ; Protection Relays; Testing is carried out with our „proposed" settings and it is

## Power System Studies

Power Flow Study (aka Load Flow) is electrical analysis used during design phase. It has a big influence on Protective Device Coordination, equipment sizing (transformers, cables, breakers, fuses, switchgears). Main goal is to find answer about: current, voltage, and power flow in the electrical system under multiple modes of operation; influence on equipment size and operation

## About Us

For more than 30 years, Mr. Bailey has been involved in the development of cutting-edge technologies. Mr. Bailey is the founder of Bailey Power Systems and several other companies. As an entrepreneur and serial inventor with more than 35 international patents, Ken has

collaborated with other prominent inventors that have changed human history.
