

European Solar Energy Storage

Cayman Islands best way to store electricity

Overview

Reducing electricity consumption can protect Cayman's environment, lower residents' costs, and help move us toward energy independence. Here are ways Cayman can take meaningful steps in that direction.

Reducing electricity consumption can protect Cayman's environment, lower residents' costs, and help move us toward energy independence. Here are ways Cayman can take meaningful steps in that direction.

The Caribbean Utilities Company has received approval for a large battery which can store some 20 megawatts of energy - equivalent to around 20% of Cayman's daily energy needs.

Saving energy has many advantages—it helps the environment by reducing our carbon footprints, leads to a more efficient use of resources and reduces the amount of money we spend on our energy needs, whether it be electricity or fuel.

Solar systems and solar power in Cayman including CUC's electric solar grid-tie system, home energy storage systems and Cayman's solar farms.

(CNS): The utility regulator, OfReg, has approved a 20-megawatt utility-scale battery installation for Grand Cayman's power provider, CUC, paving the way for the company to store renewable energy for back-up power at its North Sound Road plant. CUC said it could save customers a collective \$5 million per year.
