Does Centrica have a role in the energy transition?

Centrica has a role at every step of the energy transition. When it comes to energy, we make it, store it, move it, sell it and mend it. Find out how we're energising a greener, fairer future. Net Zero isn't next, it's now. Join us on our mission to energise a greener, fairer future. Supporting our customers through.

How did Cameroon's hydropower potential influence energy access rate?

In the specific case of Cameroon, a more in-depth knowledge of the country's hydropower potential could have influenced power infrastructure development policy and led to improved energy access rate.

Why is Cameroon a key player in energy integration?

Large hydropower with an estimated potential of 23 GW makes Cameroon a key player in the energy integration of the sub-region, with in perspective the export of electricity to hydro-poor neighbours such as Chad, Central African Republic and Congo.

Can Cameroon achieve Central Africa Power Pool?

The pivotal role of Cameroon in achieving Central Africa Power Pool's objective is highlighted. Many large hydropower and storage plants in Cameroon might feed the Inga-Calabar power highway. Small-hydropower and pumped-storage are showing good prospects for electrifying many remote areas in Cameroon.

How will Centrica's terawatt extension affect UK power generation?

These extensions will add 9TWh [terawatt hours] to Centrica's electricity generation volumes between 2026 and 2030. The move supports the UK's baseload power generation, aligning with the country's net zero ambitions and maintaining grid stability amid increasing renewable energy integration.
