ENERGY STORAGE

Based on our review of existing state and utility programs, CEG/CESA recommends that states consider the following best practices for using

energy storage for peak demand reduction:

California Battery Energy Storage Safety Recommendations

CESA and ACP-CA recommend that all future BESS facilities over 4 megawatt hours (alternating current) using chemistries susceptible to thermal runaway be developed in modular outdoor enclosures, which limits the risk of fire propagation.

This issue brief, released by Clean Energy Group and CESA, outlines best practices and lessons learned for state policymakers and regulators engaged in developing energy storage peak demand reduction programs.

Introduction to Strategen Consulting, CESA, ESNA, and GESA

At 100+ members strong, CESA is committed to advancing the role of energy storage in the electric power sector. CESA is a 501c(6) membership-based advocacy group. CESA is

technology and business model-neutral and is supported solely by the contributions and coordinated activities of its members.

DECEMBER 2024 Bridging the Gap

Colorado Senate Bill 9, which was passed into law in 2018, establishes the right of Colorado citizens to own and interconnect energy storage, stating that "(I) It is in the public interest to limit barriers to the installation, interconnection, and use of customer-sited energy storage facilities in Colorado; and (II) Colorado's consumers of

Energy Storage Program Design for Peak Demand Reduction

This issue brief, released by Clean Energy Group and the Clean Energy States Alliance (CESA), outlines best practices and lessons learned for state policymakers and regulators engaged in developing energy storage peak demand reduction programs.

Commercial and Industrial ESS

Air Cooling / Liquid Cooling

- Budget Friendly Solution
- Renewable Energy Integration
- Modular Design for Flexible Expansion

ENERGY STORAGE BEST PRACTICE GUIDE

It is my belief that, as energy storage projects continue to grow in number and scale, this comprehensive document will serve as a qualitative guide for energy storage developers and financiers alike and a basis for further effort in support of the industry.
