Chile borrego energy

Overview

Who is Borrego energy?

"We bring the expertise, experience, culture and development approach we honed at Borrego to New Leaf Energy and the ECP family of companies," said Dan Berwick, CEO of New Leaf Energy. "Borrego made us the best renewable energy developer in the country, and we will always share a bond with our friends there."

What happened to Borrego?

SAN DIEGO, July 28, 2022 /PRNewswire/ -- Borrego, a leading developer, EPC and O&M provider for large-scale solar and energy storage projects throughout the United States, today announced it has completed the spin off and sale of its development business to ECP.

What does Borrego do?

Borrego offers a broad range of renewable energy services and has a track record of superior performance in the hundreds of large solar and energy storage projects it designed, built, and maintains throughout the U.S. Established in 1980, it has regional offices in California, Massachusetts, and New York with a nationwide footprint.

How does Chile benefit from solar energy?

The country benefits from consistently strong winds in mountainous region of Patagonia and some of the world's highest levels of solar radiation in the Atacama Desert. This predictable supply of wind and solar energy has led the Chilean government to estimate that 13% of the world's green hydrogen will be produced within its borders.

Why are solar panels important to Chile's green hydrogen industry?

Solar panels pictured in Chile's Atacama Desert are crucial to the country's green hydrogen industry. Chile has set an ambitious goal of converting 70% of

its total energy consumption to renewables by 2030 and pledged to become carbon neutral by 2050.

Will Chile achieve net-zero emissions by 2050?

Last December, Chile's centre-right government published the country's first energy transition strategy, which provided targets for achieving net-zero emissions by 2050, including accelerating solar, wind and geothermal energy across the country.
