

## European Solar Energy Storage

# China innovation aviation energy storage revenue

## Overview

---

By 2021-2022, the power battery installed capacity of the company has leapt to the third and seventh place in China and the world, and ranked second among the third-party power battery enterprises in China. In terms of revenue, the company's revenue in 2021 was 6.8 billion yuan and YoY 141.3%.

By 2021-2022, the power battery installed capacity of the company has leapt to the third and seventh place in China and the world, and ranked second among the third-party power battery enterprises in China. In terms of revenue, the company's revenue in 2021 was 6.8 billion yuan and YoY 141.3%.

On May 11, 2022, China Innovation Aviation announced that it has signed a contract with Wuhan Economic and Technological Development Zone for a 30GWh power and energy storage battery expansion project at the Wuhan base, with a total investment of 12 billion yuan. The first phase of the Wuhan base.

On the evening of January 26, 2022, the official website of China Innovation Airlines issued a document saying that the company has signed investment cooperation agreements with the governments of Guangzhou and Jiangmen in Guangdong Province, and will plan to build battery factories with a. Who is China innovation Aviation?

According to the data, China Innovation Aviation is mainly engaged in the design, research and development, production and sales of power batteries and energy storage systems, and has now become one of the leading power battery companies in China and the world.

Will China innovation Aviation increase its production capacity in 2025?

China Innovation Aviation announced in November 2021 that its production capacity plan in 2025 will exceed 500GWh, which is the second time that China Innovation Aviation has raised its production capacity plan within the year.

How much money will China innovation Airlines raise in 2021?

China Innovation Airlines will complete a new round of equity financing in 2021, with a fundraising scale of 12 billion yuan.

Will China innovation Aviation be listed on the Hong Kong stock exchange?

On March 11, China Innovation Aviation Technology Co., Ltd. (hereinafter referred to as: China Innovation Aviation) officially submitted the A1 prospectus to the Hong Kong Stock Exchange and planned to be listed on the Hong Kong Main Board, with Huatai International as its sole sponsor.

Will China innovation Airlines achieve 300 GWh production capacity in 2025?

China Innovation Airlines announced in June 2021 that it plans to achieve a planned production capacity of 300 GWh in 2025, a 50% increase from its previous target.

How China is accelerating Advanced Energy Solutions deployments?

The country has become a global force in the acceleration of advanced energy solutions deployments. Here, we showcase the particular strides China is making in energy storage and clean hydrogen. China has been the leading force in accelerating advanced energy solutions deployments like energy storage and clean hydrogen.

## China innovation aviation energy storage revenue

### China Innovation Aviation Research Report: The Rising Star

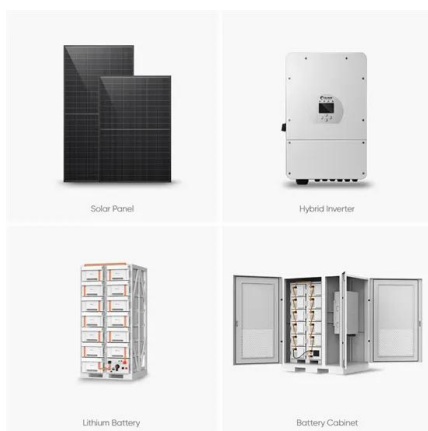

In 2021, the revenue of power batteries and energy storage systems will be 6 billion yuan and 450 million yuan respectively, a year-on-year increase of 143% and 87%. In 1Q22, the power battery revenue increased by 284% year-on-year, and the sales volume increased by as much as 215%.
