

European Solar Energy Storage

Christmas Island genesis energy solutions

Overview

Why did we install solar & battery storage systems on Christmas Island?

Christmas Island - home to the greatest migration of red crabs in the world, and an island that is almost all national park. We installed solar and battery storage systems at two sites on Christmas Island for Parks Australia to provide clean power to their main headquarters and research field station.

Can solar power a seed cleaning shed on Christmas Island?

As part of a scientific research focusing on agriculture on exhausted mining areas, a seed cleaning shed on Christmas Island is being powered by solar+storage.

Does Christmas Island National Park have solar & battery storage?

Solar and battery storage for Christmas Island National Park. Christmas Island - home to the greatest migration of red crabs in the world, and an island that is almost all national park.

How many MW will Genesis have?

To service the houses and communities close by, talks are underway to increase capacity to a total of 334MW. Genesis has executed a Concession Agreement to construct, own and operate 360MW (natural gas) to be delivered in phases. The project is the first IPP project in the country and will displace the use of HFO and diesel.

Is Genesis a 'concession agreement'?

Genesis has executed a Concession Agreement to construct, own and operate 360MW (natural gas) to be delivered in phases. The project is the first IPP project in the country and will displace the use of HFO and diesel. Phase 1 (43 MW) has attained a financial close.

Technical Resources

TECHNICAL RESOURCES. Let our technical expertise guide your designs. We are the experts at what we do - connectors and custom engineered solutions including cable assemblies. Our technical support team includes salespeople, applications engineers, and product managers who are here and in your local area to help support your design challenges.

(PDF) Lava Petrogenesis from Christmas Island: Isotopic Insights

In Figure S7 we demonstrate excellent correlations for trace element abundances determined by different (XRF, ICP-MS and INAA) techniques. We are therefore confident Geosciences 2022, 12, 118 8 of 36 that the trace element abundances reported in this study can be used to develop potential petrogenetic models for Christmas Island magma genesis.
