Overview

What is cmlu Energy AG?

CMBlu Energy AG enables a sustainable and fair energy transition in various sectors and markets. CMBlu Energy AG enables a sustainable and fair energy transition in various sectors and markets. It specializes in energy storage, renewables, redox flow batteries, e-mobility, organic flow, energy future, sustainability, and energy transition.

What's happening at cmlu Energy AG?

Technology breakthroughs, awards, company updates – there is a lot happening at CMBlu Energy AG. Watch this space to stay up to date with the latest developments. Our Organic SolidFlow battery is ready to power the renewable energy transition. Discover our green battery technology.

Does cmlu energy have a large-scale energy storage solution?

CMBlu Energy, together with collaboration partners, is currently working on multiple pilot projects in the U.S. and Europe to prove out its large-scale energy storage solutions. These include publicly announced projects with WEC Energy Group in Wisconsin, Salt River Project in Arizona, and several other sites in Europe.

What does cmlu's funding mean for the energy industry?

The funding accelerates CMBlu's deployment of its technology, addressing a crucial growth opportunity for the global energy transition. The partnership will also benefit electric utilities, power producers, and large energy customers, enabling them to integrate renewable energy with long-duration energy storage.

When was cmlu energy founded?

CMBlu Energy was founded in 2011. Where is CMBlu Energy headquartered?

CMBlu Energy is headquartered in Alzenau, Germany. What is the size of CMBlu Energy?

CMBlu Energy has 190 total employees.

What is cmblu funding?

Funding will enable CMBlu to scale up domestic production of its safe, sustainable, and secure long-duration battery storage systems

Renewable Power Generation , Energy Storage , CMBlu Energy AG

The global renewable energy industry is up against one huge challenge: How to store the massive quantities of intermittent solar and wind power it generates. Combining CMBlu's Organic SolidFlow batteries with photovoltaic or wind farms strongly decreases intermittency and flattens the renewable power generation curve.
