

## European Solar Energy Storage

# Colombia energy vault

## Overview

---

How much money has Colombia committed to supporting different energy types?

In 2020-2021, in response to the COVID 19 pandemic, Colombia has committed at least USD 1.57 billion to supporting different energy types through new or amended policies, according to official government sources and other publicly available information. These public money commitments include:

What is Colombia's energy policy?

Since August 2022, Colombia's energy policy under President Gustavo Petro has called for increased development of renewable energy sources and reduced economic dependence on fossil fuels. The MME (Ministerio de Minas y Energía), formed in 1974, oversees Colombia's mining industry, mineral industry, and electricity sector.

Will Ecopetrol become a Colombian integrated company of energy?

Ecopetrol has announced its intention to advance in its transformation to be the Colombian Integrated Company of Energy.

Why does Colombia have a poor energy sector?

Lack of accountability in the Colombian energy sector allows for problematic outcomes. The gaseous nature of coal deposits in Colombia has caused a large number of occupational accidents and deaths. Poor ventilation, poor worker training, and inadequate regulation are all factors in methane-related accidents.

Is biomass a source of electricity in Colombia?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. Colombia: How much of the country's electricity comes from nuclear

power?

Nuclear power – alongside renewables – is a low-carbon source of electricity.

Is Colombia a good country for hydroelectric power?

With high rainfall rates and a topography favorable for hydroelectric power projects, Colombia has developed hydro as its primary source of electricity, comprising two-thirds of installed capacity and electrical generation in 2020.
