ComAp

NEO5500 PANEL + MAINS Follow. Order code: RTNEO5500-MAINS, RTNEO5500. Complete enclosed control solution streamlines the microgrid design process by providing the components needed to manage renewable energy resources and storage with a utility mains connection in one package.

ComAp

Founded by three friends in 1991 in the Czech

Republic, ComAp has grown into a global industry leader for smart energy control. In the past three decades we have gained strong expertise and experience, introduced innovative products and commissioned thousands of projects in different industries and segments worldwide.

ComAp

It can control the entire microgrid site in islanded or grid-connected configurations and supports all energy sources, including BESS and up to 64 gen-sets. The IntelliNeo 5500 is an all-in-one solution featuring a full ...

ComAp

9 February, Prague, Czech Republic - ComAp announces the new IntelliNeo product family that furthers ComAp's activity in hybrid microgrids and their support of the world's transition towards more sustainable sources of power. IntelliNeo controllers can manage any source of renewable power, be it solar, wind, batteries, or hydrogen.

Microgrid Controllers , ComAp

The solution is a combination of the IntelliGen 500 gen-set controller, a custom microgrid ComAp firmware upgrade activated by a software key and an IntelliFieldbus Gateway for interaction with third-party products, including solar inverters. IntelliSys NTC Hybrid.

InteliGen 500 Microgrid

InteliGen 500 Microgrid is a new solution for complete microgrid control. The system ensures full control of the energy resources in your microgrid, efficient energy management and remote monitoring. The solution is a combination of the IntelliGen 500 gen-set controller, a custom microgrid ComAp firmware upgrade activated by a software key
