# Company energy Venezuela

## Overview

---

Venezuela ranked 11th in the world for oil production in 2016; production has since fallen steeply. The largest oil company is (PDVSA). Oil fields in the country include , , and . In 2023, Venezuela held the world's largest proven oil reserves at 303 billion barrels, accounting for 17% of global reserves, mostly from the . Despite this, producti.

What type of energy does Venezuela use?

Venezuela relies heavily on domestic production of fossil fuels, with oil and natural gas comprising approximately 90% of the country's total energy supply. Hydro power also plays a key role in electricity generation, accounting for roughly half of installed capacity.

Does Venezuela have a natural gas industry?

Despite having an abundance of crude oil reserves, the nation's oil production has experienced a significant decline in recent years. To attract foreign investment, Venezuela has granted numerous natural gas exploration and production licenses to private firms, but only a handful of these licensees are currently operational.

What is happening in Venezuela's oil industry?

Reduced capital expenditures by state-owned oil and natural gas company Petróleos de Venezuela, S.A. (PdVSA), along with increased U.S. sanctions, have resulted in foreign partners continuing to cut activities in the oil sector, making crude oil production losses increasingly widespread.

How much natural gas does Venezuela have?

Venezuela has significant natural gas reserves, accounting for 73% of total natural gas reserves in South America and totaling 195 trillion cubic feet (Tcf) as of 2023.<sup>23</sup> The majority of the country's natural gas reserves are associated with crude oil; around 80% of produced natural gas is associated gas produced as a by-product of oil production.

Which sector will dominate the Venezuelan oil and gas market?

The upstream sector, which encompasses the exploration and production of crude oil and natural gas, is projected to dominate the Venezuelan oil and gas market. The country permits foreign enterprises to invest, but mandates that the state-owned oil and gas firm retain a majority equity in joint ventures.

What is the role of coal in Venezuela's energy mix?

In comparison to oil and natural gas, coal plays a minor role in Venezuela's energy mix, accounting for 0.2% of total energy production and 0.1% of total energy consumption. Venezuela's coal industry has faced challenges such as outdated infrastructure and limited investment, which has affected production.
