

European Solar Energy Storage

Connected and solar energy

Overview

Con Edison is committed to supporting New York state and city's clean energy goals and helping customers generate their own energy through solar. The company has invested approximately \$600 million in renewable projects in 2020, expanding its footprint to 20 states and operating.

Con Edison is committed to supporting New York state and city's clean energy goals and helping customers generate their own energy through solar. The company has invested approximately \$600 million in renewable projects in 2020, expanding its footprint to 20 states and operating.

Understand how your home can harness the sun's energy and see how you can earn credits on your bill with the electricity you generate from solar. How the power of the sun can help power your home. Is Solar Right for Me?

What you need to know before considering solar energy. Important information.

Let's explore the renewable energy opportunities available to ConEd customers in the context of New York's broader push for a sustainable future. The shift towards renewable energy comes with plenty of benefits, both environmentally and economically. By replacing fossil fuels with cleaner energy.

The easiest way to reduce your electricity costs is by installing solar panels. They can eliminate most of your electricity bill, all while powering your home with clean, renewable energy. We won't lie to you, though - figuring out how to start the solar installation process is confusing.

We're building a climate-resilient grid that will deliver 100% clean energy by 2040. © 2016 - 2025 Consolidated Edison Company of New York, Inc. All Rights Reserved.

For many low-income customers and residents of Disadvantaged Communities, gaining access to local renewable sources of energy can often feel like swimming against a current. Even when they do, the costs involved

could be prohibitive. Expanding Access to Renewable Energy for All Two nascent programs.

The New York State solar map can give you an estimate of how much electricity can be generated by a solar system on your building. Will my solar panels work during a power outage?

As per New York state law, grid-connected solar systems will shut down for safety reasons during a power outage. If. Why is Con Edison charging me for solar panels?

Solar panels can offset your overall energy consumption, but they typically do not reduce your monthly demand. Demand charges cover Con Edison's cost to maintain our facilities to meet our customers' maximum energy needs. I got solar panels so I'd never have to pay another Con Edison bill ever again. Why are you still billing me?

.

How can ConEd help customers switch to solar energy?

By simplifying this process and providing substantial incentives, ConEd is making it easier than ever for customers to switch to solar energy. Switching to renewable energy can be a daunting process, but CleanChoice Energy makes it easy for customers to take the leap.

Is Con Edison building a climate-resilient grid?

We're building a climate-resilient grid that will deliver 100% clean energy by 2040.

When will Con Edison's grid be 100% clean energy?

We're building a climate-resilient grid that will deliver 100% clean energy by 2040.

What happens if my solar installation does not generate enough electricity?

If your solar installation does not generate enough electricity to meet your needs, Con Edison's grid will make up the difference. If you use more electricity from the grid than your renewable system generates, your net consumption is positive, and your Con Edison bill will include charges for the amount of kilowatt-hours used.

What are the benefits of net metering for Con Edison customers?

Net metering allows Con Edison customers to offset their monthly consumption with excess credits at a lower cost per kilowatt-hour than the retail rate. This can lead to significant savings on your electricity bill. However, it's important to consider your consumption patterns when enrolling in a Time-of-Use rate.
