Discover their hidden obsessions, their weird rabbit holes and the Creators & Artists they stan, we get to see a side of our guest Creator like never before...in a way that only can.

ValueError: Expected 2D array, got 1D array instead [Fixed]

Calling the fit() method with two 1-dimensional arrays caused the error. One way to solve the error is to use the reshape() method to reshape x into a 2-dimensional array.

[Music on the App Store](#)

We update our app all the time in order to make your Music experience better. We polished a few things, fixed bugs, and made some performance improvements.

ColumnTransformer -- scikit-learn 1.7.1 documentation

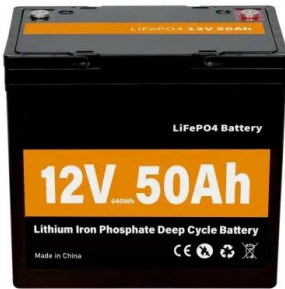

Applies transformers to columns of an array or pandas DataFrame. This estimator allows different columns or column subsets of the input to be transformed separately and the features ...

Netflix

Netflix Netflix is an American subscription video on-demand over-the-top streaming service. The service primarily distributes original and acquired films and television shows from various ...

confusing fit failure when using `set_config(transform_output="pandas")`

Using `set_config(transform_output="pandas")` in combination with `ColumnTransformer` may result in a failed fit, since indices do not align as expected.

Sklearn transform error: Expected 2D array, got 1D array instead

Reshape your data either using `array.reshape(-1, 1)` if your data has a single feature or `array.reshape(1, -1)` if it contains a single sample. How to fix it? try ...
