

## European Solar Energy Storage

# Containerized renewable power quotation in Serbia 2030

## Overview

---

What will Serbia's future look like in 2030?

Serbia is planning an ambitious future from now with 100 times more solar power and 10 times more capacity in wind parks for 2030, aiming to cut greenhouse gas emissions by 40.3% and achieve a share of 41% of renewables in gross final energy consumption.

How will electrification affect the energy and climate goals of Serbia?

Considering the significant increase in the share of renewable energy production by 2040, further electrification of the transport sector will have a positive impact on the energy and climate goals of the Republic of Serbia.

How is energy policy implemented in Serbia?

The Energy Law envisages that energy policy is elaborated and implemented in more detail through the Energy Sector Development Strategy of the Republic of Serbia, the Strategy Implementation Program, and the Energy Balance of the Republic of Serbia.

How does the transition of Serbia's energy sector affect prices?

The transition of Serbia's energy sector, in the context of the implementation of a new energy strategy, takes place in the turbulent time, first due to changes in demand and the restructuring of global energy markets, and then due to a series of geopolitical challenges, leads to a sudden and uncertain increase in prices certain forms of energy.

What are the social consequences of changes in Serbia's energy sector?

The social consequences of changes in Serbia's energy sector are manifold. One aspect of those consequences relates to the new energy system and prices, conditioned by new energy policies and laws. The second aspect includes employment, earnings and lifestyle of people, primarily employees of energy companies and their families.

How much wind power will Serbia have in 2030?

The ministry laid out the provisional targets for 2030: Add 3.51 GW in wind power or ten times more than what is now installed in Serbia. Read the full news [here](#).

## Containerized renewable power quotation in Serbia 2030
