

## European Solar Energy Storage

# Containerized solar power plant turnkey solution price in Poland

## Overview

---

Poland is now one of the Top 5 solar PV investment markets in Europe. In 2021 alone, the country added around 3.2 GW of solar PV installations. With a cumulative installed solar PV capacity of 7.1 GW.

Will solar power be a good investment in Poland in 2025?

Thanks to additional government subsidies for small private PV systems and high electricity prices of over 30 eurocents per kilowatt hour for companies, investments in own electricity generation in both areas will become attractive in 2025. In September 2024 alone, PV systems with a total power of 363.53 megawatts were installed in Poland.

Is there a potential for large-scale solar PV development in Poland?

Aside from those systems, there is also significant potential for large-scale PV development in Poland. Especially since 2019 - in the CfD tenders for large-scale RES installations - solar PV was able to successfully compete with onshore wind farms.

Will Poland be able to generate electricity in 2025?

Poland will reach an installed photovoltaic capacity of 20 gigawatts by the end of this year. Thanks to additional government subsidies for small private PV systems and high electricity prices of over 30 eurocents per kilowatt hour for companies, investments in own electricity generation in both areas will become attractive in 2025.

What are the prospects for photovoltaics in Poland?

The prospects for photovoltaics are very positive, especially in the commercial sector, which is largely due to the electricity pricing policy. While private households in Poland pay 0.22 euros per kilowatt hour, the electricity price for commercial enterprises is 0.39 euros per kilowatt hour.

How will Poland's electricity price cap affect virtual power purchase agreements?

The Polish government has recently adopted an act limiting electricity prices that protect citizens from uncontrolled price raises. As a result, it limits the income of energy producers and companies. The cap in effect until the end of 2023 will likely negatively affect virtual power purchase agreements.

How much solar energy does Poland have in 2021?

In 2021 alone, the country added around 3.2 GW of solar PV installations. With a cumulative installed solar PV capacity of 7.1 GW at the end of 2021, Poland is now a major European solar energy market, with many investors developing large-scale projects far exceeding the 100 MW project scale.
